# WIRE ROPE CLEANING & LUBRICATION

**NEW  
SERVICE  
LAUNCH**

**Improve  
wire rope  
life up to  
300%**

**2000m/h  
Grease up to  
2000M of  
wire rope  
p/h**

**Suitable for  
wire ropes from  
6mm - 165mm  
diameter**

## ROPE LUBRICATOR

Our Wire Rope Lubrication range provides fast and effective cleaning and lubrication of wire ropes, from 6mm (1/4") to 165mm (6-1/2") in diameter, which can be greased at speeds up to 2,000 meters per hour.

### Wire Rope Lubrication Benefits

- Increases the life of wire rope assets by up to 300% versus manual lubrication.
- Reduces re-lubrication time of ropes from several days to several hours.
- Environmental benefit with less lubricant used and therefore less discarded.
- Safer work environment.

## ROPE CLEANER

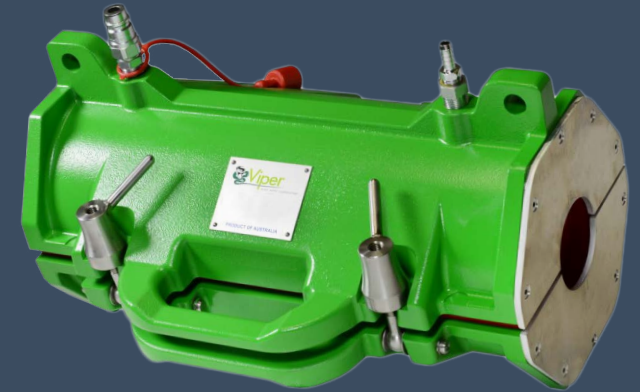

In order to conduct a visual inspection of wire rope assets, it is critical that the old lubricant and contamination is removed from the outer strands and valleys of the rope, prior to inspection.

Our wire rope cleaners enable the removal of contamination or built-up old lubricant from the wire rope prior to lubrication, improving the effectiveness of the lubrication process.

### Wire Rope Cleaning Benefits

- Effectively removes external contamination on wire ropes so visual inspection of rope can take place.
- Reduced downtime associated with rope lubrication which improves equipment availability.
- Less wear on sheaves and winch drums.
- Removes contamination in the valleys of the rope to provide improved lubricant penetration.
- Unit has two support bushes spaced well apart to stabilize the unit effectively.
- Safer for staff, reduced lubricant usage, less leakage and mess.
- One-person job - no tools required easy to install and use.
